

Choose The Name You Can Trust...For Nearly 60 Years!

LAS Enterprises has been supplying the home improvement needs of the Gulf Coast region for nearly 60 years. Committed to creative engineering that marries both form and function, we have been custom manufacturing retrofit and new construction windows and storm protection products since the 90's.

LAS does not simply manufacture "replacement" products, we manufacture "improvement" products. Anyone can order and buy windows or shutters and hire a sub-contractor to replace them. At LAS we want to "improve your home" and give you the peace of mind that you are getting the best. That's why we say "We Know" home improvement.

Designed to enhance the beauty and charm of your home with the finest architectural finishes available, our shutters and windows are assembled in our Louisiana manufacturing facility, installed by LAS employees and fully warranted by LAS.

Why LAS?

- LAS is the same company your grandparents called. "We Know" home improvement.
- LAS manufactures our own proprietary windows and shutters. No other company can match our product quality.
- LAS knows the Gulf Coast weather patterns and we have modified our product design to withstand the extreme climate.
- LAS installation crews are employees. Installation is an important part of the job, and at LAS, we don't take that lightly. We don't send out just anybody to your home.
- LAS has a fully staffed service department. Our service technicians were previously installers, they are experienced and know our products.
- LAS builds, installs and warrants – no middle man. **No one** else can say that.

Don't Be a Victim!

Many home improvement companies go out of business in 3-5 years, leaving service calls and warranty claims a nightmare for unsuspecting homeowners. Don't get stuck with no one to turn to, make sure you **ask how long** a company has **been in business**. If it has been less than 3 years, buyer beware.

Questions to ask your contractor.

- Where are my products manufactured? By whom?
- Is my warranty from you or the manufacturer? What happens if the manufacturer goes out of business?
- Are you a state licensed contractor? Do you carry both general liability and workers compensation?
- Who will be installing my products? Do you warranty your subcontractor's work?
- How long have you been in business?
- Do you have a service department?
